### The Opposite of Fate

Amy TAN

A collection of non-fiction pieces from the acclaimed novelist, this is an extended meditation on fate and its effect on her life. Influential alternatives include choice, chance, luck, faith, forgiveness and philosophy. This book provides valuable insights into her life, her stories and her writing processes. Whether relating her family's secret histories, her traumatic but loving relationship with her mother, travels in China or in Stephen King's rock band, close encounters with the spirit world or the reason she has not been able to write these past few years, this is an absorbing and enjoyable book.

### Bond

Alan BOND  
& Rob MUNDLE

We all think we know Alan Bond – larger than life, a flamboyant tycoon and a man who went from being Australia's bona fide hero for winning the America's Cup to a man brought down by corporate fraud. At his peak, his business interests included the mining of gold, nickel and diamonds, breweries, retailing, newspapers and television stations. He even started his own university. At his lowest, he was declared bankrupt and imprisoned. From his own perspective, finally, the real story behind Alan Bond and his rise and fall.

### The Lost German Slave Girl

### Iris Murdoch As I Knew Her

A N WILSON

Having known Iris Murdoch for 30 years, Wilson is uniquely placed to restore her reputation as a novelist, philosopher and woman of fierce intelligence. Deeply offended by the memoirs of Murdoch's husband – and the resulting film – which portrayed her as a pitiful victim of Alzheimer's, this controversial and insightful biography is written with love and respect. The anecdotes and intimate details of their friendship are finely drawn and it is difficult not to relish the asides and tangents that Wilson takes as he revisits the past, breathing wonderful life into this somewhat eccentric and unconventional woman.

### Sir Keith Murdoch The War Correspondent Who Founded an Empire

Ronald YOUNGER

Founder of the Murdoch media empire, Keith Murdoch came from humble beginnings as the son of a Scottish minister. He began his journalistic career on a Melbourne newspaper and first made a name for himself when reporting on the withdrawal of troops from Gallipoli, after writing about the dreadful conditions and failure of the operation. A dedicated journalist and a remarkable entrepreneur, he was also passionate in his support of libraries and the visual arts. This portrait highlights the remarkable extent of his influence, revealing the true face of the man behind the empire.

Bailey has crafted a compelling read that explores American conceptions of slavery, both legal and social. The story also describes the economic conditions in Europe that led to the migration of families like the Müllers. Halfway between history and suspense, this is a fascinating, if occasionally discomforting, story of slavery in ante-bellum America.

## Evolution's Captain

### The Dark Fate of the Man Who Sailed Charles Darwin Around the World

Peter NICHOLS

Robert FitzRoy will be forever remembered as the young captain who invited the even younger Charles Darwin to accompany him on a five-year voyage in the 1830s. FitzRoy's involvement with Darwin is well-known, but there was much more to his life, as this very readable book shows. His brilliant survey work in South America, his interactions with the natives of Tierra del Fuego, his stint as governor of New Zealand and his work in weather forecasting – it's all here! The author, an experienced yachtsman, is particularly successful in describing the maritime parts of FitzRoy's life. *Dave*

## Arthur Miller: A Life

Martin GOTTFRIED

Arthur Miller has delivered powerful drama to the stage for decades with masterpieces such as **Death of a Salesman** (Pb \$16.95). Yet, remarkably, the full story of his extraordinary life has been shrouded from public view. To achieve this groundbreaking portrait, the award-winning drama critic and biographer masterfully draws on private and professional interviews throughout Miller's life, his voluminous lifelong correspondence, and annotated scripts and notebooks that reveal his creative process in stunning detail. From political and social activism on the world stage to an extraordinary professional vitality – even as he turned 88 in October 2003 – here is a literary event of the first order.

## A Double Life

### A Biography of Charles and Mary Lamb

Sarah BURTON

They were part of London's famous literary network in the early 19th century, but they were also siblings tied together by a horrific event. In September 1796, Mary killed her mother with a carving knife. Charles, 21 at the time, took it upon himself to care for her as she swung between sanity and madness. Meanwhile, Charles also suffered from severe depression and alcoholism, and had to admit himself to the Hoxton madhouse. This account visits London's darker corners, where poverty stalked rented rooms and madhouses concealed terrible abuse, creating the mulch for growing the literary geniuses you will meet in this book.

## Oscar Wilde

### A Life in Letters

Merlin HOLLAND

Wilde's conversation is lost and his autobiography unwritten, but his letters reveal him at his spontaneous, sparkling best. Fluent in style, they bear that most familiar of Wildean hallmarks – the lightest of touches for the most serious of subjects. When disgrace and imprisonment followed his short period of fame and success in the early 1890s,

(when he corresponded with many leading political, literary and artistic celebrities), even in adversity his humour did not desert him. Holland has compiled the most revealing letters, a helpful commentary and some previously unpublished photographs, which together form the closest thing we have to Wilde's own memoir.

## Mortification

### Writers' Stories of their Public Shame

Robin ROBERTSON

There is something about the conjunction of high-mindedness and low income that is inherently comic; something about the very idea of deeply private thoughts – carefully worked and honed into art over the years – being presented to a public audience of dubious strangers, that strays perilously close to tragedy. Here, in over 80 contributions, are stories about the audience, the fellow readers, the organiser, the venue, the 'hospitality' or the often-interminable journey there and back. Includes tales from Margaret Atwood, Julian Barnes, Louis de Bernieres, Margaret Drabble, Roddy Doyle, Kazuo Ishiguro, Norman Mailer, Colm Toibin and James Wood.

HB \$39.95

## Olive Weston

### The Heroic Life of a World War II Nurse

Peter FENTON

Her husband called her "the bloody Australian rebel", but the rest of the nation knew her as a heroine. The moment that war was declared in the Pacific, Olive Weston lied about her age to get into the US Army. With deep

devotion and gentle intelligence, Fenton follows her experiences as a nurse (trained in tropical maladies) and as a mother (to her intellectually challenged son), taking us on an incredible journey through the life of a compassionate, utterly selfless woman who dedicated her years to the handicapped. This biography both educates and inspires.

## Shot: A Personal Response to Guns and Trauma

Gail BELL

At the tender age of 17, Gail Bell's life was marked so deeply by an event that it would take 35 years for her to be able to finally set it down in print. This book is a remarkable and moving exploration of the physical and psychological anguish of gun violence. Bell takes us through her own story of being shot, to the stories of victims of the Port Arthur massacre and a study of gun culture in general, to some very engaging existential ideas about trauma and the individual. Although not your typical Yuletide fare, this is truly from the heart.

## The Curious Life of Robert Hooke The Man Who Measured London

Lisa JARDINE

A brilliant, but largely forgotten, figure of the 17th century cultural and scientific revolutions, Hooke was an engineer, surveyor and scientist who became London's Chief Surveyor after the Great Fire. He worked tirelessly with Sir Christopher Wren to rebuild London throughout the 1670s, personally creating some notable public and private buildings. A dandy, a workaholic and an inveterate socialiser, he was a celebrity and an enthusiastic daily imbibor of the designer drugs of the time: coffee, tea, chocolate, tobacco, cannabis and opium. Unfortunately, after violent rows with Isaac Newton, his name was virtually wiped from the records. This book brings him back to life.

## The Cruise of the Janet Nichol Among the South Sea Islands A Diary by Mrs Robert Louis Stevenson

Roslyn JOLLY (editor)

In April 1890, a steamer set off from Sydney for a three-month Pacific trading voyage. Aboard were seven white men, 40 islanders and one woman: a short-haired, barefoot, cigarette-smoking American, Fanny Van de Grift Stevenson. Her spirited personality led her into scenes and situations that few European women experienced. Her diary and its photographs offer unique glimpses into life in some of the last independent Pacific kingdoms. This extraordinary travel book is the story of an unconventional woman, her unusual marriage and her adventurous journey through a rapidly changing world. A must read!

## Goya

Robert HUGHES

Hughes first encountered Goya's work while studying in Australia and this introduction forms the starting point of a journey through the artist's life in 18th century Spain. Hughes charts Goya's entire career, describing his painted and graphic oeuvre within its historical context. Particular attention is paid to Goya's patrons; his favourite themes; his criticism of the Catholic Church and encounters with the Inquisition; his fierce anti-war philosophy; and his reputation amid his contemporaries. What emerges is a picture of an artist fully committed to documenting his times with an unflinching eye for truth and injustice.

## Reading Lolita in Tehran A Memoir in Books

Azar NAFISI

After resigning as a professor at a Tehran university due to the repressive policies, Azar Nafisi invited seven of her best female students to her home to attend weekly studies of great Western literature. These books – written by Nabokov, Jane Austen and others – were officially banned by the Iranian government, so the meetings were held in secret. This is the story of the two years during which the meetings changed the lives of all the participants. Skilfully combining her own observations of the group with new insights into the literature under veiled eyes, Nafisi creates her own literature of both poetry and inspiration.

## Man Booker 2003 Fiction

Absolutely not for the faint-hearted, this is social satire in the blackest of humour. Vernon is carrying the can for a high school turkey shoot that resulted in 16 deaths. As his life goes from plain ridiculous to downright bizarre, it is impossible to refrain from both empathy and laughter.

**The Secret Cure**

Sue WOOLFE

How honourable is love? A man works on his memoir, trying to explain his unusual actions. Isolated by his voicelessness and his mother's teachings, he experiments with venturing out into the world. He falls into a job at the local hospital – and into love. Years later, a woman writes an extended letter explaining her illegal activities. She also fell in love, with a strangely remote but respected scientist; years later, she returns to his laboratory, disguised as a cleaner, to secretly work on a cure for her autistic daughter. A marvellous and compelling story, satisfying and beautifully written.

**Seven Houses**

Alev Lytle CROUTIER

Set in Turkey during the 20th century, this beguiling novel follows the fortunes of three generations of women through the seven houses they live in. From a beautiful waterside mansion in Smyrna, a glorious silk plantation near Bursa, humble country dwellings and jerry-built modern apartments, the stories of the women are revealed. Family secrets, desires, histories and gossip abound, beginning with Esma, who bought her house with a large sapphire. The narrative continues with the beautiful daughter she cannot raise, Aida, and her granddaughter Amber, who flees stifling conformity for America and her dreams. An unusual and lyrical novel.

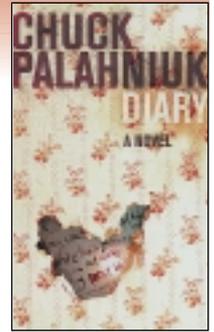

PB \$27.95

**Diary**

Chuck PALAHNIUK

Former cult novelist (**The Fight Club** Pb \$21.95, **Lullaby** Pb \$22.95), now literary heir apparent, Palahniuk tackles the classical horror genre in diary form. On a small island suffused with tensions between old families and new summer visitors, and from the starting point of graffitied rooms hidden by a now comatose handyman, the funny and disturbing *Diary* gathers pace. The narrative is never nasty, sitting somewhere between Poe and Polanski, and builds towards a real idea of humanity in a tale of art, anatomy and asceticism. Not only for his fans, the scariest thing is just how engrossing this novel is.

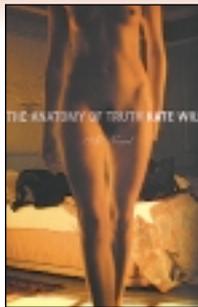

PB \$32.95

**The Anatomy of Truth**

Kate WILD

The daughter of the one-time town whore, Janey Hunter, has spent her life watching folk in their small town. Today she is bound and gagged on a makeshift platform, about to be 'judged' by them. An outcast, she longs for something to wake them up, to make her the centre of attention, which she contrives by turning everyone against her only friend. Fifteen years later, when the friend returns, another harrowing scene will be enacted. This gothic-style debut novel by a young Australian will keep your attention until the final page.

**The Way the Crow Flies**

Anne-Marie MacDONALD

This compulsively readable novel starts in the 1960s on a Canadian air force base. Seen through the eyes of Madeleine, whose family has returned from an overseas posting, the base should be a safe environment. But there are shameful secrets, a child is murdered and a popular local teenager is charged. Meanwhile, her adored, morally upright father has his own secrets and is torn by conflicting loyalties to his family, friends and country. Years later, the past starts to interfere with her life and Madeleine has to confront her part in the tragedy. An ideal summer read.

**Mr Golightly's Holiday**

Salley VICKERS

Mr Golightly doesn't really get the modern world. Nonetheless, he has decided to take time out from Golightly Enterprises to try his hand at writing – of all things – a soap opera. His employees have created a buffer from the demands of the everyday, but they cannot help him in the English village to which he 'escapes'. As he is drawn into its beguiling web of local mysteries and burgeoning friendships, it turns out he knows quite a lot about people and their habits. Vickers' prose is completely charming and this affable book will bind you until its mysteries are slowly unveiled.

**The Clearing**

Tim GAUTREAU

Set in the 1920s in the steamy cypress forests of Louisiana, this powerfully evocative novel concerns two brothers – one the lawyer, the other the manager of a sawmill. The elder brother, scarred by his war service in

France, has come adrift, and the younger tries to understand what has driven his idolised brother to the edge of civilisation, and to the edge of his sanity. Caught up in a feud with gangsters who own the local saloon, both brothers have to confront and deal with their inner demons. A layered, complex novel that sucks the reader in as surely as those Louisiana swamps!

**A War for Gentlemen**

Jackie FRENCH

Narrated by his daughter, this is the tale of an Australian with itchy feet and big ideals who left Australia to fight in the American Civil War (for the Confederates). Lyrical descriptions expressing Charles Fitzhenry's passion for the natural world, especially the Australian landscape, are interspersed throughout the account of his battle experiences and his flight to a new life with his uncle's slave. The narrative moves back and forth in time, resounding with the echoes of the war in the lives of his children and grandchildren. This is an inspirational read.

**The Fifth Book of Peace**

Maxine Hong KINGSTON

Writing in many languages (American, Chinese, poetry, dreams, song, history, hallucination and tragedy), the question Kingston repeats is simple: "Why war, why not peace?" Her original novel, *The Fourth Book of Peace*, was destroyed in a house fire. This work re-imagines that book, the tale of Wittman Ah Sing and his family. It details Kingston's journey through fire (both real and metaphorical), follows her quest to illuminate myths regarding the Chinese Three Lost Books of Peace and, last but not least, she submits her impassioned plea to veterans of all wars to help her convey a literature of peace through their writings and hers.

Tracy CHEVALIER

Through the eyes of the delightfully arrogant painter, Nicolas des Innocents, we are taken on a journey through 15th century France. Travelling beyond bustling Paris to the idyllic Brussels countryside, Nicolas is commissioned to create a magnificent tapestry for the greedy and much feared noble, Jean le Viste. After the success of **Girl with a Pearl Earring** (Pb \$19.95), Chevalier again weaves her natural gift for lyric storytelling with a palette of romantic players to create this enchanting story.

PB \$27.95

**Homecoming**

Adib KHAN

This story very quickly makes you care about the life of its protagonist and, through him, about the long-term, misunderstood effects of war. It is a story about gaps between people, which lifetimes are just too short to bridge. Martin Godwin is a Vietnam veteran who lives a quiet life in Melbourne's suburbs, except that his wartime experiences return (noisily) in his dreams and, increasingly, in his waking hours. The horror of one event in particular is gradually unravelled and the narrative offers complex, and ultimately moving, portraits of Godwin's relationships with equally plagued friends and family. As always, Khan offers compellingly layered and affecting fiction.

**The Book of Illusions**

Paul AUSTER

One man's obsession with the mysterious life of a silent film star takes him on a journey into a shadow world of lies, illusions and unexpected love. After losing his wife and young sons in a plane crash, Vermont professor David Zimmer spends his waking hours mired in grief. Then, watching television one night, he stumbles upon a lost film by silent comedian Hector Mann and he remembers how to laugh. Written with breathtaking urgency and precision, this stunning novel plunges the reader into a universe in which the comic and the tragic, the real and the imagined, the violent and the tender, dissolve into one another.

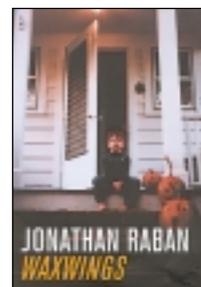

PB \$22.95

**Waxwings**

Jonathan RABAN

Best known for his wonderful works of non-fiction (**Coasting** Pb \$23, **Passage to Juneau** Pb \$21), Raban turns his subtle and imaginative sentences on to a fictional English writer living comfortably in a Seattle suburb and a contrasting illegal Chinese economic refugee living uncomfortably on the city's streets. The surprising plot is set at the very end of the last millennium, moving among internet start-ups and anti-globalisation rallies, from crimes personal to public, from boom to bust. As usual, it is Raban's keen observations as an understanding observer that anchor the reader. Like his non-fiction, this is about the relationship between person and place, and the pleasures and pains of having roots, or tearing them up.

A John Rawlings Mystery

Deryn LAKE

1761, London. Famous blind magistrate John Fielding is to be honoured with a knighthood. At the investiture in St James's Palace, the audience eagerly cranes for a glimpse of the new queen (rumour has it she is ugly), while nobleman George Goward tumbles down the great staircase. Only one person witnesses anything untoward: Fielding, known to the mob as the Blind Beak. A whispered sentence and an exhalation of breath are the only clues to suggest the fall was no accident. Apothecary John Rawlings offers his investigative skills and is soon drawn into the middle of a very puzzling mystery.

### Rare Beasts (Edgar & Ellen #1)

Charles OGDEN  
(illustrated by  
Rick CARTON)

Every town has a 'wrong side of the tracks' and Nods Limbs is no exception. Siblings Edgar and Ellen live there, plotting gruesome deeds to execute upon the hapless townsfolk. One day, they decide to kidnap all the town's pets and transform them into exotic animals so they can sell them back to their rightful owners and make thousands of dollars. This is a wacky little gothic story – a cross between Edgar Allan Poe, the Addams Family and Tim Burton – and the illustrations are wonderfully gloomy. Fans of Lemony Snickett should also enjoy it.

This sequel to **Barry Trotter and the Shameless Parody** (Hb \$19.95) takes place after the wizard Trotter has saved Hogwash School. Barry and Ermine Cringer are now man and wife. They also have two children, one of whom has become a great magician, but the other doesn't seem to have any magic powers at all. Could he be a Muggle? A clever send-up of the Harry Potter books, this will delight fans of humorous fantasy and anyone wanting to have a laugh at the whole bestselling phenomenon.

### Hades' Daughter and God's Concubine (The Troy Game #1 & #2)

Sara DOUGLASS

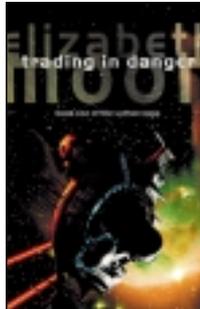

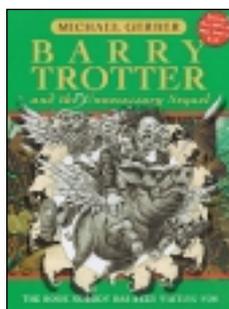

Ariadne wreaks revenge on her lover Theseus for his betrayal by ending the Game (the protection of the ancient Greek cities by magic), bringing destruction to Greece and pulling down the gods themselves. Generations later, her descendant, Genvissa, tries to restart the Game in ancient Britain. In her thoughtless quest for power, she brings disaster to those around her, damning them to relive the horror in other incarnations. Douglass uses different techniques to tell this story, splicing the action in ancient Greece with scenes from 1939 London. A powerful story which spans the millennia, this is a great read and I am eagerly awaiting the next instalment.

Gregory MAGUIRE

This retelling of Snow White gives some foundation to the original fairytale. Set in Renaissance Italy, it tells the story of Vincente De Nevada, who is sent by the Borgia family to find three apples from the Garden of Eden. His daughter Bianca is sent into the woods to die, but discovers the seven dwarves, who are truly sons of the earth, elementals born of stone and soil. Innovative use of the poison apple and magic mirror elements is particularly interesting. Maguire's writing style is lush and quite exquisite in its descriptions. Writing from the point of view of several characters, he creates an historical fantasy that expands upon and enriches the original tale.

This is Stephenson's ambitious reworking of 17th century European history in a period when scientific advancement was accompanied by much political turmoil. ## The Man Who Found Time James Hutton and the Discovery of the Earth's Antiquity

Jack REPCHECK

For centuries, according to the unquestionable authority of the Bible, it was believed the Earth was about 6,000 years old. But a Scottish gentleman-farmer and chemist observed the processes of erosion on his property and started to think deeply about the age of rocks. James Hutton was part of the Scottish Enlightenment; he knew David Hume, Joseph Black, James Watt and Adam Smith. Although highly intelligent, his writing style was convoluted, but luckily he inspired disciples, and while his theories were met with bitter controversy, they eventually became the basis for modern geology. A fine book, combining history and science in an accessible, engaging manner.

Brian CLEGG

Exploring some of the most mind-boggling features of mathematics and physics, this work examines amazing paradoxes such as Hilbert's Hotel, an imaginary resort with an infinite number of rooms that all happen to be occupied, while an endless coach turns up carrying an infinite number of new guests. It's not a problem, though; it's easy to prove they can all be accommodated. From Archimedes to the latest theories, we look at the people who have grappled with the idea of infinity, its place in mathematics and science, and even how some infinities are bigger than others! A challenging subject made comprehensible.

**A Place on Earth  
An Anthology of Nature Writing from  
North America and Australia**

Mark TREDINNICK (ed)

From the time of Henry Thoreau, North America has been home to a rich literature dedicated to bringing places alive to readers. In Australia, where nature writing as a genre is less established, there are nevertheless outstanding writers, such as Tim Winton, Eric Rolls, Barbara Blackman and Charmian Clift, whose works are included here. Responding to places that sustain, inspire, bewilder and sometimes sadden, these pieces are propelled by passion, anger, history, ecological imagination, spirituality, despair or deep personal experience. The places considered vary as much as any on Earth, but what each piece has in common is beautiful, resonant writing.

**The Miraculous Fever Tree  
Malaria, Medicine and the Cure that  
Changed the World**

Fiammetta ROCCO

Malaria kills someone in the world every 30 seconds, primarily in tropical countries. However, for more than 1,000 years there was no cure, and it claimed victims throughout the world. Malaria badly weakened the Roman Empire, it killed thousands of British troops fighting Napoleon and soldiers on both sides of the US Civil War, and it brought the building of the Panama Canal to a standstill. Combining the results of her research with tales of her own encounters, Rocco traces the history of quinine from its discovery by Jesuit missionaries in Peru to its use by expanding colonial powers and its role in the development of modern anti-malaria pills.

This latest offering from the author of **Crucible of Creation** (Pb \$32.95) explores the theme of convergence in evolution. Unlike Stephen Jay Gould, who believed that running the tape of life over and over would result in a different outcome each time, Conway Morris believes that certain solutions to life's problems would be (and actually have been) repeated. He is convinced that evolution – far from being a random, directionless process – shows deep patterns and perhaps even a purpose. After examining instances of convergence in the history of life on Earth, he discusses its implications for intelligent life in the universe.

## The Electronic Whorehouse

Paul SHEEHAN

Paul Sheehan, author of the bestseller **Among the Barbarians** (Pb \$22.95), is one of the most controversial and thought-provoking commentators in Australia today. Here he turns his formidable intellect to the subject he knows best, the media itself. Revealing the agendas, manipulations, back-biting and herd instinct that make up much of our traditional press, he relentlessly shines a spotlight on the media's handling of some of the most heated issues debated today, including the mandatory detention of asylum seekers, ethnic crime, the Stolen Generation and Aboriginal genocide. Pyrotechnically controversial, this will be the most talked about bestseller this year.

## Death Sentence

Don WATSON

Watson is deeply offended by the "lifeless sludge" that passes for public language and this is his response to years of impenetrable communiqués that have been churned out by government departments, news media, corporations and politicians (although I wonder how much of it he was responsible for himself!). He raises many valid points that bear serious thought and I applaud his endeavour, but I feel it's too little, too late. Orwell has already described the decay of language and we are now living with the consequences.

## Militant Islam in Southeast Asia Crucible of Terror

Zachary ABUZA

Doggedly attempting to wade through myriad obfuscations on all sides, Abuza embarks on intensive 'on the ground' investigations and speaks with key militants to explain the emergence of radical Islamic groups in the region. He examines Al-Qaida's role as organisational catalyst and explores the responses of individual and multilateral states to the growing, and increasingly violent, Islamic political consciousness. He also thoughtfully analyses state strategies for combating, co-opting or coping with militant Islamic groups. A key question is whether state actors are trying to resolve the root causes of Muslim disaffection or merely using the war on terrorism to suppress the symptoms.

### The Skewed Tale of the Tower of Pisa

Nicholas SHRADY

This is a marvellous book for fans of Italian history, architecture and tales of bureaucracy. One of the most recognisable symbols in the world, the campanile in the Campo dei Miracoli ('the field of miracles') is a marvel of Romanesque architecture (although it took over 300 years to be finished). It is also an engineering wonder, since the degree of inclination could not be modelled on a computer without the simulation toppling! Tracing its construction and conservation, exploring its myths and gracefully narrating its effect on visitors, this book comes (literally) with a lean all of its own!

### Flesh in the Age of Reason

Roy PORTER

This book was completed shortly before Porter's untimely death. It is an immediate, important and attractive book that marks the culmination of his work on the British Enlightenment. At its core is an attempt to unravel an all-encompassing obsession: ourselves. What were the breakthroughs that allowed human beings to see themselves as modern? The mid-17th century (the world of Bunyan, Hobbes, Milton, even Newton) seems impossibly remote to us now. But during the astonishing ferment of the Enlightenment, philosophers, scientists, journalists and novelists created a whole new picture, so that by Lord Byron's lifetime, we find a world that is recognisably our own.

In a battle that became increasingly political, symbolic and personal, the virtually impenetrable German defences claimed many lives. It is a story of incompetence, hubris and politics. With attention to race, class and gender, this first truly global history of WWI traces the conflict from its origins to its aftermath. Emphasising the experiences of soldiers in all theatres, as well as citizens on the home front, Morrow looks beyond trench warfare and argues that the war was won not in the fields of France, but in the cold waters of the Atlantic, where blockades starved central powers into submission. Powerfully written, concise and comprehensive, it illustrates the destabilising effects of imperialism on both the colonisers and the colonised.

## Hitler and the Power of Aesthetics

Frederic SPOTTS

The Hitler of this biography is not the homicidal maniac described in most volumes. Here he is someone for whom culture was not only the end to which power should aspire, but also the means of achieving it and keeping it. The centrality of the arts in his life and career has been mostly ignored, although as George Mosse said, "the fascist aesthetic reflected the needs and hopes of society, it was the means through which people grasped the message and transformed (Nazi) politics into a civic religion." ## Battle A History of Combat & Culture

John LYNN

Spanning the entire globe and the centuries, this wonderful book explores the way that ideas shape the conduct of warfare. Drawing

## The Cambridge Illustrated History of the Roman World

Greg WOOLF (editor)

Greg Woolf, currently Professor of Ancient History at the University of Saint Andrews, was in Australia earlier this year and delivered two excellent and intriguing lectures at the conference of the Australian Society for Classical Studies. This latest work draws together a wide range of information, as well as a number of academics, to present an overview of the Roman world from 753 BC to the 5th century AD. Lavishly illustrated and integrating economic, social, architectural and military perspectives on Rome (to name but a few), this is an ideal way to explore the ancient world. *Sarah*

## The Seventy Great Mysteries of Ancient Egypt Unlocking the Secrets of the Pharaohs

Bill MANLEY

In this new addition to the *Seventy* series, international teams of Egyptologists explore mysteries surrounding Egypt's relations with other peoples, such as the lost African kingdom of Punt; puzzles that set the ancient Egyptians apart from other cultures; and new mysteries, such as evidence of Tutankhamun's murder and unexplained shafts inside the Great Pyramid. Famous people and places are discussed, including Ramses the Great, Akhenaten, the Great Pyramid, the Valley of the Kings, as well as shadowy figures like Senenmut, Smendes and Khababash. Hundreds of photographs and specially commissioned diagrams, maps and reconstructions complement the intriguing text.

## Pepys and the Navy

Charles KNIGHTON

These days Pepys is best remembered for his brilliant **Diary** (Pb \$19.95), but in his lifetime he was known as the efficient and clever chief naval official under Charles II and James II. Although his career was twice interrupted by the unstable political situation of his times, he instigated many reforms, including half-pay for officers and a shipbuilding program on a scale previously unknown. Drawing on Pepys' own library, this fascinating account underlines how important his work was in creating a permanent, professional Royal Navy.

## Courtesans

Katie HICKMAN

In ages past, courtesans set fashions, caused scandals and lived in unimaginable luxury. Their independence made them famous, but socially inadmissible. Aristocratic men might know them, but society women certainly did not! Five famous English courtesans are the subjects of this well written book: Sophia Baddeley, beautiful and wildly extravagant; Elizabeth Armistead, who became the beloved wife of an influential politician; Harriette Wilson of the sparkling memoirs; Cora Pearl, who lived the high life in Paris; and Catherine Wilson, consummate horsewoman and confidante of kings. All wholly different and wonderful characters. This is a great read, combining biography with social history.

## North of Capricorn The Untold Story of Australia's North

Henry REYNOLDS

The 19th century towns of Australia's tropical north – from Mackay to Broome – differed from those in the south. Closer to Asia, they contained a diverse mix of peoples: Melanesians in the cane fields, Japanese in the pearl industries, Chinese in the gold fields and businesses, Filipinos and Ceylonese in shipping and, of course, the local Aborigines. They were dynamic, multi-racial towns, which ran contrarily to the White Australia Policy, the first social legislation of the new Commonwealth. This excellent book, copiously illustrated with rare photographs, is carefully researched and reveals what Australia could have been like if Capricornia had prevailed.

## The Times Medieval World

Rosamund McKITTERICK

With 80 full-colour spreads, this dramatically designed and newly illustrated history covers nearly a millennium of one of the world's most formative phases. Its geographical scope is vast, treating all major cultures outside the Americas from AD 500 to 1492, including the Arab invasions of Europe, the empire of Charlemagne, the African kingdoms of Songhay and Mali, the Crusades, the Viking and Mongol invasions, the Delhi sultanate and the Tang and Ming empires. A great introduction to a multitude of contrasting and competing cultures, many of which laid crucial foundation stones for the building of modern societies.

## Wine Odyssey

James HALLIDAY

Australia's favourite wine writer invites readers to join him for a year of travel, wine tasting and work in the vineyards. His journal traces his sojourns around the world as he judges wine shows, addresses critics and growers at exhibitions, holidays in his French country farmhouse and oversees the vintage on his Coldstream Hills vineyard in Victoria. It might seem like an idyllic life, but he sets a cracking pace, with hardly a day's rest amidst the back-to-back flights, tastings and functions, not to mention the deadlines for books, magazine articles and newspapers.

Ian KELLY

Part biography, part Regency cookbook, this contains some of the most sumptuous menus and recipes ever created. We follow Caramé's meteoric rise from Parisian orphan to international celebrity, through the turmoil of the French Revolution to the kitchens of the Brighton Pavilion and beyond. He knew the favourite dishes of George IV, Rossini and the Romanovs. He knew Napoleon's fast food requirements and why Empress Josephine suffered halitosis. The wonderful recipes he created bring the very taste and smell of the early 19th century alive. It was Caramé who first coined the phrase, "You can try them yourself."

**A Death in Brazil**

Peter ROBB

"Like everyone, I went to Brazil to get away..." Combining travel, history, literature, culture and his own memories of 20 years of Brazilian life, Robb delves into the past and present. He takes us on a journey into a sensual and frightening world, describing the remarkable rise of Lula da Silva, Brazil's first working class President, and her predecessor Fernando Collor and his sinister bagman Farias, who looted Brazil of billions. Robb shows how their successes and downfalls, along with murder, ambition, sexual drama and family jealousy, surreally mirror the stories of the TV soap operas that are watched nightly by millions of devoted Brazilians.

Don GEORGE (editor), Preface by the Dalai Lama

Here are some wonderful stories about unexpected kindnesses bestowed upon troubled travellers in times of dire need, often when travelling in countries where they don't speak the language, know the culture or have any way to repay the kindness received. With contributions from notable authors including Simon Winchester and Isabelle Allende, as well as many previously unpublished writers, these tales are simultaneously heart-warming and heartbreaking, ultimately presenting us with a beautiful and rare glimpse into the kinder side of human nature.

## Pimsleur

For those who want to learn a language, but don't have time to sit and work through a book, the Pimsleur series is a perfect solution. This specially designed method for learning

through listening contains no written materials at all. Unlike many all-audio programs, which simply get learners to parrot sentences, the Pimsleur method is much more creative. By asking questions and getting learners to put sentences together themselves, it encourages a more active role in the learning process. Available as Quick and Simple, for those wanting only the absolute basics, and Instant Conversation, for a much better grounding (and including the Quick and Simple program).

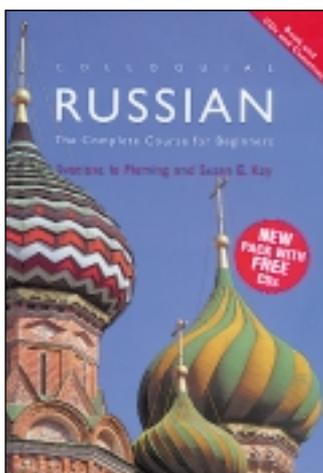

**Quick and Simple (4 Cassettes/CDs) \$48.00**

### Mi País Inventado

Isabel ALLENDE

Allende's memoir is both an intimate portrait of her life and a reflection on her Chilean homeland. She explores the role of memory and nostalgia that helped form her life and her books, with a structure that follows the peripatetic nature of memory. Her recollections are punctuated by two key events - the Chilean military coup on 11 September 1973 and the terrorist attacks in the United States on 11 September 2001. In the former, she lost a country, and in the latter, she gained a country, when she recognised her deep allegiance to the United States.

## Inkheart

Cornelia FUNKE

Meggie's father, Mo, is a bookbinder with a secret: when he reads aloud, the characters in the story leave the page and come alive. Unfortunately, this means he has lost his wife and released an evil character, Capricorn, into the world, who not only wants to use Mo's powers for his own nefarious ends, but needs to destroy all the copies of the story in which he originated. Mo, Meggie and her great-aunt Elinor race to find the last copy in the hope of averting disaster. A great story that will have kids aged 9 to 13 turning the pages as fast as they can read!

## Dacked!

Andrew DADDO

A collection of short stories aimed at boys aged 9 to 12 who might not read much, revolving around summer activities such as surfing, swimming, fishing and camping. They won't be stretched, but they'll be entertained by Fergus's exploits. Amusing drawings contributed by Terry Denton.

## Too Many Pears!

Jackie FRENCH & Bruce WHATLEY

Pamela the cow just loves pears, no matter how they come – red, green, covered in chocolate or cream, stewed, in pies or cakes, or fresh off the tree, she simply can't get enough. But this means no one else ever gets any! It takes one resourceful young girl to stop Pamela's pear pinching ways. As with their bestselling collaboration, **Diary of a Wombat** (Hb \$24.95), French's text is funny and reads aloud beautifully, while Whatley's clear and cleanly coloured illustrations add a sly and expressive humour that is sure to delight kids and adults alike!

## The Great Art Scandal

Anna NILSEN

This is such an eye-catching book! It combines a mystery story, a game and some of the greatest paintings of the 19th and 20th centuries. An exhibition is about to open, but the interpretative panels have been stolen, challenging the reader to determine who painted what and to locate the fakes. With a split-page format and magnifying panel, the paintings can be closely examined to find the answers. Excellent reproductions of paintings by artists such as Van Gogh, Nolan, Warhol, Gauguin and Pollock educate and entertain. Brilliant for ages 8+, but make sure you get a go yourself!

## A Series of Unfortunate Events The Slippery Slope

Lemony SNICKET

The eagerly awaited Book the Tenth in the dire sequence of extraordinary misfortunes that befall the Baudelaire orphans. What nastiness lies within, apart from frozen waterfalls, clouds of malicious snow gnats, secret headquarters, a casserole dish bed, child slavery, unexpected meetings and the usual villainous machinations of the dastardly Count Olaf? Venture on, dear reader, always remembering that much nicer books are on the shelf, but few as compulsively necessary as this, if you wish to know how Violet, Klaus and Sunny keep going!

## Stravaganza City of Stars

Mary HOFFMAN

Georgia, 15, has a bullying stepbrother, low self-esteem and loves horses. She is transported to the 15th century equivalent of Siena in another world. Remora is a city divided by fierce allegiances, united only by the annual horse race. Disguised as a boy, she gets caught up in the complex politics of the city, where a winged horse has been born and the Republic wishes to show its strength. This is a brilliant, well-written book with believable characters and a clever, exciting plot. Those who have read **Stravaganza: City of Masks** (Pb \$15.95) will have an idea what to expect; for those who haven't, a rare treat is in store!

## Little Book of Flowers

Della THOMAS

It is a slim little book, but we all know size is not a reflection of worth! The full colour reproductions of Ellis Rowan's botanical art are accompanied by poetry from the likes of Judith Wright, Kenneth Slessor, James McAuley and Douglas Stewart. The delights of plants such as Sturt's Desert Pea and the River Red Gum come to life in this format, making this a delightful stocking filler. Brought to us by the National Library of Australia's Pictorial Collection.

## Madame Bovary, C'est Moi The Great Characters of Literature and Where They Came From

André BERNARD

Virginia Woolf once wrote, "If the characters are real, the novel will have a chance." This delightful compendium takes us on a casual stroll through literary history with some of the world's most successful writers as they search for just the right name, or just the right tone, or just the right prop, for their hero or heroine. Was Tolstoy's Anna Karenina based on a real person? Why was Agatha Christie's Hercule Poirot a Belgian, rather than a Frenchman? How did Tolkien conceive of the hobbits? In this charming collection of anecdotes, we are taken to the very heart of the mystery of literary creation.

## The Flower Hunter Ellis Rowan

Patricia FULLERTON

This stunning book has its genesis in a National Library exhibition. It contains an excellent biography of Rowan, whose work was criticised on the basis that it fell between botanical illustrations suitable for museums and fanciful paintings that belonged in art galleries. Today, we appreciate them as beautiful, highly accurate works. Ellis would set off into the wilds, dressed in correct Victorian attire, to create her watercolour studies on grey paper, often under conditions that were quite dangerous. The true beauty of this book lies in the abundance of full colour reproductions – glorious botanical studies that will have you coveting the originals!

## The Annotated 'Christmas Carol'

Charles DICKENS & Michael HEARN

What would Christmas be without *A Christmas Carol*? Dickens' famous ghost story is as much a part of the Christmas season as prawns and beer. This edition, part of the Norton Annotated Series, delves into the engrossing story of the book's publication when it first captivated Victorian England. It combines the original text of 1843 with Dickens' Public Reading text, which had its world premiere in America in 1867. Rare photographs and the original John Leech wood engravings and hand-coloured etchings are supplemented by other contemporary illustrations by George Cruikshank, Gustave Dore, John Tenniel and Phiz.

## Cat Tales

### The Meaning of Cats in Women's Lives

Jan FOOK, Susan HAWTHORNE & Renate KLEIN (eds)

"Happiness is being owned by a cat," said Evelyn Moseley. This is a delightful collection of pictures, stories and poems about cats and their female owners (or, perhaps more accurately, the people owned by cats). Over 80 women from different countries and cultures share tales about the friendships and bonds they have with their delightful, cheeky and often naughty companions. These cats are as diverse as the women who share their lives. Read about cats who open fridges, sign contracts and cats in drag. A lovely insight into how pets impact on our lives, this is a wonderful book for anyone who loves animals.

## Jack Aubrey Commands A Historical Companion to the Naval World of Patrick O'Brian

Brian LAVERY

Respected naval historian Lavery sets forward the historical framework of the bestselling Aubrey-Maturin series. He explores the historical facts behind the grand narrative and fully contextualises key episodes – as well as the minutiae of naval life – in the era of Nelson and Napoleon. Published as a tie-in to the forthcoming dramatisation of the series (directed by Peter Weir and starring Russell Crowe as Jack Aubrey), it has a foreword and introductory chapter by Weir in which he outlines his fascination with the O'Brian novels and the challenges posed by the dramatisation. One for old seadogs and new, who can all catch up with the entire series at Abbey's.

## The Grand Tour

Peter GOSSELL & Harry SEIDLER

Harry Seidler has spent more than 50 years travelling the globe, extensively photographing the peak achievements in architecture from 3000BC to the present day. Thanks to some early advice given to him by his photographer brother Marcell (only use Leica cameras and Kodachrome film, which is archival),

Seidler's hobby quickly developed into a passion and, finally, an impressive archive of world architecture. Including many of the world's most famous architectural structures, the photographs illustrate the history and style of architecture in Europe, the Middle East, Asia and the Americas, while Gossell's literary text brings it all together.
